

Stone TOPS

Fienza's engineered quartz stone tops are available in various sizes and styles, and come with a luxurious polished finish. Our quartz stone tops are 20mm thick and are highly resistant to scratches and dents. Unlike marble or granite tops, the non-porous surface also means they are highly resistant to stains. Each stone top is composed of approximately 90% natural quartz making it extremely hard and resilient for optimum durability.

IMPORTANT: Our Stone products are NOT intended for outdoor installation, this will void Warranty.

CHECK GOODS THOROUGHLY BEFORE INSTALLATION

Check goods thoroughly for any damage or faults upon receipt. Installation of received goods that are damaged, warped or faulty will void warranty. This product must be stored away from moisture and direct sunlight on a horizontal flat surface.

Crystal Pure

Roman Sand

Bianco Marble

Polar Sacco

Calacatta Marble

Terrazzo Nougat

Urban Crete

Dove Grey

Black Sparkle

Nero Vena

Cleaning & Care

IMPORTANT: Avoid direct sunlight. Prolonged exposure to sunlight can cause the finish to discolour and crack. When this is not possible, reduce the amount of light by the use of window shades, drapes or blinds.

- For every day cleaning use a soft sponge or dishcloth with warm water.
- For stubborn or greasy clean-ups use a PH neutral liquid cleaner or ordinary dishwashing detergent with warm water applied with a soft sponge or dishcloth.
- For any persistent staining issues, products without bleach can be applied first to a wetted sponge or dishcloth, and then applied to the countertop surface. Please note that aggressive use of more abrasive non-chemical cleaners can result in dulling of the quartz surface.
- To sanitise a quartz surface, a 70% isopropyl rubbing alcohol solution can be used or a disinfectant spray.
- Avoid using sponges that contain aluminium oxide (the same abrasive in sand paper) as it may dull the finish.
- Though most common household cleaners have no effect, never allow your Fienza countertop to come in contact with drain cleaners, paint strippers, acetone or products containing Hydrofluoric acid, Ammonia, Methylene chloride, Trichloroethylene or any product with a very high or very low PH. These types of chemicals may etch or discolour the surface.
- There is no need to seal your countertop. Unlike natural stone products which have porous surfaces, our quartz is non-porous, meaning that any sealer applied will not penetrate beyond the surface of the material. Eventually, the sealer may start to wear off unevenly in high use areas causing the polish to appear inconsistent.
- Fienza stone tops are scorch resistant and under normal conditions are not affected. Always use a trivet or hot pad between the quartz and any heat generating device including but not limited to crock pots, deep fryers, hot pots and pans or electric skillets. Sudden or rapid change of temperature or sustained heating, especially near edges and cut outs, may create enough thermal expansion energy to cause your countertop to crack. Damage caused by thermal expansion is not covered under the Fienza warranty.
- Brushed, honed or concrete finishes by nature of their textured surface may require daily cleaning in order to maintain a pristine appearance. These alternate finishes have an increased surface texture and as a result may show more surface markings as a result of normal day to day activities. Markings caused as a result of normal use of the countertop will be only on the surface and should be easily removable by use of any the approved cleaners or cleaner types mentioned above.
